

Kiosk System **ASTALON**

Basic Configuration

- 19 inch display with 1280 x 1024 pixel resolution
- PC system with current performance parameters
- Current version of operating system pre-installed
- Standard electrical equipment

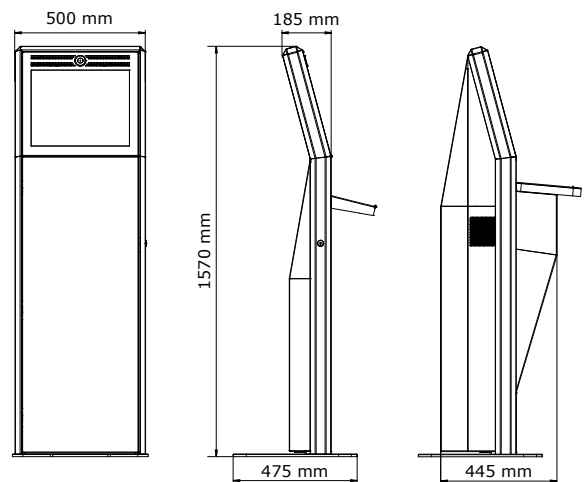

Optional Extras

- Stereo sound system with adjustable sound output
- Touch screen (resistive, capacitive, or infrared)
- Standard keyboard
- Stainless steel keyboard with trackball, waterproof
- Wi-Fi / UMTS Antenna
- Webcam
- Card reader
- Bluetooth
- Colouring as desired
- Thermal printer / Laser printer
- On-site service
- Warranty extension
- Further options available upon request

Installation

- Weight: approx. 80 kg
- Typical power consumption: 80 W
- Rated voltage: 230 V

Measurements

The ASTALON model is a flexible unit with regard to the integration of components. In addition to numerous optional components, there is even space for a laser printer, among other things.

The door on the front side of the machine allows easy access to all components, which means paper can be refilled, for instance, without moving the machine away from the wall.

Both a high quality Zeiss-IKON security lock with a self-developed locking mechanism as well as the stable method of construction using steel plates enable the use of the kiosk in unattended, heavily trafficked indoor areas.

Some examples of possible uses of the ASTALON model include providing general information, for wayfinding, as a POI, as a POS, for time recording, for providing employee information, as a virtual porter, or for trade shows and multimedia presentations.

Individual design through the use of stick-on graphics
