

Kiosk System **HERA**

HERA terminal in black
with a keyboard

HERA terminal in silver
without a keyboard

The HERA model is a standing terminal for inside areas with plenty of space for additional components. For instance, a A4 printer, a card reader, and even a fingerprint reader can all be integrated into the unit.

The door on the front side of the machine allows easy access to all components, which means you can refill paper in the printer, for instance, without moving the machine away from the wall.

Both a high quality security lock as well as the stable method of construction using steel plates and aluminum enables the use of the kiosk in unattended, heavily trafficked indoor areas.

Possible uses of the HERA model include providing general information, for wayfinding, as a POI, as a POS, for time recording, for providing employee information, as a virtual porter, or for trade shows and multimedia presentations.

Individual design through the use of
stick-on graphics

Basic Configuration

19 inch display with 1280 x 1024 pixel resolution
PC system with current performance parameters
Current version of operating system pre-installed
Standard electrical equipment

Optional Extras

Stereo sound system with adjustable sound output
Touch screen (resistive, capacitive, or infrared)
Standard keyboard
Stainless steel keyboard, waterproof
Wi-Fi / UMTS Antenna
Webcam / Card reader / Bluetooth
A4 thermal printer / A4 laser printer
Colouring as desired
On-site service / Warranty extension
Further options available upon request

Installation

Weight: approx. 70 kg
Typical power consumption: 60 W
Rated voltage: 230 V
