

Kiosk System **ISIS**

The ISIS model is a design-oriented freestanding terminal for indoor areas.

The optional curved or straight design of the info-terminal also has an unbroken front surface.

The aluminum profile developed specifically for this info-terminal emphasizes its thin form factor (6 cm) and at the same still provides a high level of stability.

The integrated PC system is based on notebook technology and is characterized by the small amount of heat it generates and its extremely low level of energy consumption (25 watts).

Possible uses of the ISIS model include providing general information, for wayfinding, as a POI, as a POS, for time recording, for providing employee information, as a virtual porter, or for trade shows and multimedia presentations.

Individual design through the use of stick-on graphics

ISIS terminal silver/black with and without a keyboard

Basic Configuration

19 inch display with 1280 x 1024 pixel resolution
PC system with current performance parameters
Current version of operating system pre-installed
Standard electrical equipment

Optional Extras

Stereo sound system with adjustable sound output
Touch screen (resistive, capacitive, or infrared)
Standard keyboard
Stainless steel keyboard, waterproof
Wi-Fi / UMTS Antenna
Webcam
Card reader
Bluetooth
Colouring as desired
Thermal printer / Laser printer
On-site service
Warranty extension
Further options available upon request

Installation

Weight: approx. 50 kg
Typical power consumption: 60 W
Rated voltage: 230 V
